

THE EMPRESS EXPRESS

VOLUME XVI No. 50

EMPRESS, ALTA. THURSDAY, May 16, 1929

Price: \$2.00 Per Year.

United Church

The Church School, 10.30 a.m.
Public Worship, 11.30 a.m.
Services will be conducted at:
Wainfleet, 1.30 p.m.
Leland Hall, 3.30 p.m.
Social Plans, 7.30 p.m.
Please notice the changes in
the hours of service.

Rev. Gen. A. Shields,
Minister.

Succumbed to Heart Failure

Sister Margaret of the Pre
late Convent was admitted to
the Empress Cottage Hospital,
Saturday, May 4, suffering
from acute appendicitis. An
emergency operation was per
formed at once and the out
look was favourable until late
Thursday night, when she un
expectedly developed symp
toms of heart failure and de
spite all treatment expired the
following morning.

FARM FOR SALE

The Soldier Settlement Board of Can
ada offers for sale by public tender—
The East Half of Section Nineteen
(19), in Township Twenty-three (23),
Range Two (2), West of the Fourth
Meridian, containing 320 acres more
or less, reserving all mines and minerals.
Terms of sale are not less than 20 per
cent of the purchase price in cash on
acceptance of the tender, and the bal
ance in five (5) equal annual instalments,
with interest at 6 per cent per annum
on the amortization plan.

Each tender must be accompanied by
an accepted cheque for \$100. If tender
is accepted, this sum will be credited to
the purchase price of the land. If tend
er is not accepted, the money will be
returned to the tenderer.

Tenders will be opened at CALGARY,
Alberta, on WEDNESDAY, May 22nd,
1929.

The highest or any tender not neces
sarily accepted. If the land is not sold
on the date above mentioned, the land
will be prepared to receive offers to pur
chase until such time as it is finally dis
posed of.

Tenders should be in plain envelope
marked, "Tender for the purchase of
the E. 1/2 of 19-23-28 W. 4th Meridian."
Address tenders and enquiries to—
THE SOLDIER SETTLEMENT BOARD
OF CANADA,
Southern Building,
CALGARY, Alberta.

Ideal Buccaneering In "Black Pirate"

A roistering tale is "The
Black Pirate" at the Empress
Theatre, Saturday. A glorious
tale of adventure. To the col
orful exploits of Douglas Fair
banks and a pirate crew has
been added the most perfect
technique yet flashed upon the
screen. Colored pictures, no
doubt about it are here, "The
Black Pirate" proves that it
can lighten instead of de
stressing the vividness of a
thrill.

Never did more villainous
crew board the powerful mer
chantman than that headed by
Douglas Fairbanks. With a
gay "ye ho" and a muttered
curse he takes us back to the
old dark days when buccaners
sailed the Spanish main.

Treasure chests in secret hid
ing places, sparkling water and
grey sky, those are the back
ground for a swash-buckling
adventure story. Then there
are alarms and excursions and
gallant incredible rescues.

And there is Doug, too, in a
part he must have loved. When
he's not skimming up the rig
ging he's fighting duels, swim
ming through green blue wa
ters or taking a vessel single
handed. That exploit of course
is the very essence of Fair
banks. Swarming up the slip
pery sides, he is a pirate crea
ture in himself. He does every
one of the magnificent, unbeliev
able things that little boys dream
of.

Ball Game Next Wednesday

The Empress Seniors have
arranged for a game of ball
with Bursall, on May 22, at
Empress.

IMPOUNDED

At N.W. 26-28-28 W. 3rd—Sorel Mare,
aged 12 years, no brand, white face,
dark Bay Mare, 4 white feet, white
belly, brass on front shoulder,
W. 8-12 years or more.
Dark Bay Mare Colt, 1 year old, two
hind feet white, right front foot white
white flippers.
Henry Klippert, poundkeeper, Estuary,
Sask.

First Fortnightly Crop Report

Issued by Department of Agri
culture, Govt. of Alberta,
Edmonton, May 11, 1929

Approximately seventy five
per cent of the wheat crop in
the province has been seeded
and steady progress is being
made with the seeding of coarse
grains, according to telegraphic
reports received on Friday by
the Department of Agriculture.
A peculiar situation exists, as
in part of the province where
moisture has been most abun
dant, spring work has been re
tarded. In the south, where the
greatest extent. A number of
central and northern sections
report that wheat seeding has
been completed, while as a re
sult of the intermittent rains
and falls of snow over the
northern section of the province,
more than thirty or forty
per cent of the wheat has been
sown in some localities.

Moisture conditions are gen
erally satisfactory, particularly
in the south, where the effects
of the open fall and the light
snowfall of the past winter
have been largely offset by the
recent precipitation. In some
northern districts winds have
been more than usually pre
valent, and while the soil mois
ture is sufficient to promote
germination, further rains will
be required at an early date if
rapid growth is to be expected.

An increase of from five to
ten per cent in wheat acreage
of the province is anticipated
as compared with last year. This
gain will be especially no
ticeable in central and north
ern sections, where a large
amount of new land was clear
ed and broken in 1928 in readi
ness for the present year's
crop. Very little difference is
expected in the acreage seeded
to coarse grains, except in areas
where seeding of wheat has
been unduly delayed.

Good stands of fall wheat
and rye are reported, as these
crops have come through with
a negligible amount of water
killing. In a number of dis
tricts an increased acreage will
be needed to sweet clover and
other forage and fodder crops.

Wheat seeding has been prac
tically completed in the Peace
River country and moisture
conditions are satisfactory at
the present time, although ad
ditional rains will be needed
shortly to support the present
excellent prospects. In this
section of the province, a very
marked increase is noted in the
acreage being seeded this sea
son.

Owing to the abundance of

Tennis Club Organize

A meeting of the Tennis Club
took place on May 9. The
meeting was confined to the
election of officers and other
matters in connection of get
ting ready for the coming sea
son. Officers elected were:
President: J. F. Schellfield.
Vice-President: Dr. H. A. Dowler.
Secretary: J. Deporter.
Membership committee: J.
Deporter, Mrs. G. Tucker.
Executive Committee: Offi
cers of the Club and Dr. A. K.
McNeil.

Membership fees: Men, \$5;
ladies, 3.00; school boys, 3.00;
school girls, 2.00.

The courts have been rolled,
and a bee was held on Wednes
day at which considerable pro
gress was made in repairing
the fences. A general invita
tion is extended to new mem
bers by the President. It is
hoped to have the courts ready
for play shortly.

"Ben Hur" next Tuesday and
Wednesday. A mighty setting,
colored scenes, a wonderful
story.

Heavy Precipitation Marks First of the Week

Preceded by a heavy wind
storm on Sunday night the
district was visited with wel
come and heavy precipitation.
The rain commenced on Sun
day night and continued heav
ily until Tuesday evening,
amounting to snow the latter part
of the time. The precipitation
was just about right as most
of the seed is now in the ground
and while the early sown grain
was beginning to show above
ground, it was thought that
much of the later sown seed
was lying dormant. This will
have plenty of moisture to ger
minate and a verdant green
will soon be taking the place of
the black patches.

News of Special Interest

Next Tuesday evening, Wed
nesday afternoon at 3.45
prompt and again at 8.30 p.m.
there will be shown in the Em
press theatre, that greatest of
all spectacles in moving pic
tures, "Ben Hur." A brilliant
ly conceived picturization, a
mighty epoch, a picture which
for interest and education no
one should fail to see. Prices, 75c,
35c, and 25c. Matinee: 50c, 35c,
25c.

Food available during the past
winter, live stock generally has
come through in good condition
and pastures are already show
ing good growth.

Open Letter

To The Electors Of
R. M. Mantario No. 282

Ladies and Gentlemen:
In regard to the Municipal
Office and Council Chamber
there seems to be various rum
ours throughout the Municip
ality regarding same, and I take
this means of putting before
you the actual facts of the pro
posed building.

It is not the intention of the
Council to erect a Hall or place
of amusement or for entertain
ments of any kind whatever;
simply to erect a permanent
Office Building, furnace-heated
with a built in vault of ample
size to keep Municipal records,
that according to the Act must
be preserved for a number of
years.

The safe purchased some
years ago is now too small to
accommodate all records that
must be kept.

It is also necessary to provide
a suitable place for the Secre
tary to properly conduct the
business of the Municipality
with the ample room for the
necessary equipment required
for the proper performance of
a Municipal Secretary's work.

It is also proposed to erect a
Council Chamber to hold Coun
cil Meetings and have both this
and the office included in the
same building, with full base
ment under same, with the
vault built from the basement
up, in order to insure ample
storage room for Municipal Re
cords for all time. Such a vault
would cost approximately \$200
or \$1000. The estimated cost of
such a building, after careful
enquiries from other Municipal
ities which have erected offices
cannot be figured at less than
\$4,000.

Any ratepayer who has ever
been to the Secretary's present
office will, I think realize the
need of a more suitable place
as a Municipal Office and meet
ing place for the Council where
records are available at all
times when required.

PAINTING & PAPER HANGING

Have your Painting and Decorating done

Think Of the Future

A condition of prosperity prevails throughout Canada from coast to coast. It is not confined to any one section nor to any one industry or group of industries. There is, in fact, a general tendency to the extent of the situation probably without a parallel in the past history of the Dominion. This is not to say that everybody or every industry is equally prosperous, or, indeed, that there are not those who do not enjoy prosperity. The contrary is true. But taking Canada as a whole, and in the major activities of its people, prosperity reigns today.

Such a condition is, of course, gratifying. Nobody would have it otherwise, and all desire that it shall be long continued. But there are dangers to be avoided in times of more or less universal prosperity which do not present themselves when times are hard and business depression rather than business activity is in evidence. It is an old and often proved truth that many people who can and have stood strong and true through the storm and stress of adversity, and won through to ultimate victory, have cracked and broken when favored with prosperity and success.

Canada is prosperous today, and it should take full advantage of its present favorable position. The people are optimistic and should continue so. They should continue to show vision, courage, and engage in constructive development. They would be unworthy of their heritage and the future possibilities of their Dominion if they acted otherwise. But they should nevertheless have a care in the enthusiasm of the growing present not to forget the years to come.

Just as night follows day, winter follows summer, youth grows into old age, and death is the ultimate end of birth, so it is inevitable that, in course of time, depression in business will follow buoyancy. A pendulum swings just as far one way as it does the other. It is a wise man and a wise community, therefore, which when times are good and development is the order of the day, takes thought of, and prepares for that future day when retrenchment may become a necessity.

If growth and expansion is artificially pushed too far; if an individual or a community becomes committed to large future obligations in order to further speed up present development, they may find themselves in great future difficulty.

All countries, all communities, most individuals, have passed through such bitter experiences. Western Canada has not been immune from them, and those who recall the "boom" days of the past know that the period of adjustment following the collapse of a "boom" was much longer than the "boom" itself, and that in the final analysis the losses far outweighed the gains.

At the present time all our Western cities, towns, villages and rural municipalities are planning their programmes for 1929. Times are prosperous, the country is growing, and the almost universal demand for treasury expenditures to provide this and that. Today it is possible and comparatively easy to borrow the money to carry such enterprises through and to meet the initial interest charges. But a debt is created which will remain for years to come. When the present buoyancy subsides, when money is less easy to obtain, when depression and some degree of unemployment replace present favorable conditions in business, will the load be too heavy to carry?

It will be useless care is exercised by all civic and municipal authorities in seeing that the safety line in expansion is not passed, and that expenditures now made are for permanent constructive work which will be revenue producing in the years to come. Extravagance in ideas is no more justified in times of prosperity than it is at other times. It is in those "other times" that the bills really have to be paid.

Developmental works are necessary and are justified in times of prosperity, when they would be suicidal, in fact quite impossible, in times of depression. When depression prevails, it is frequently impossible to provide for even imperative and wholly justifiable expenditures. These must be provided when times are prosperous. It then becomes an equally imperative duty to provide them.

But essential, no matter how desirable they may be in other respects, should be carefully considered less citizens, the taxpayers, are unwittingly swept into the authorization of expenditures which later on they may have cause to bitterly regret.

Such words of warning are unnecessary in times of depression; it is now, when prosperity is with us, that that warnings are necessary and should be heeded.

Farm Loans Soon Available

Ottawa Ready To Administer System To Canadian Farmers

Alberts and British Columbia lead the provinces of Canada in the move to take advantage of the long term loan system, given to farmers through the Canadian Farm Loan Board. In these two provinces provincial boards have been nominated by order-in-council. This was announced by Dr. J. D. MacLean, commissioner of the Central Board, following the first meeting of that body since he returned from an organization tour of the west.

At the meeting, a statement given out by Dr. MacLean says, there was a long discussion with respect to the progress of the work of the board, both at head office and where the branches are organizing. Machinery in Ottawa is complete for the administration of the long loan system to Canadian farmers. It remains only for the provinces to form the boards and for the federal and provincial bodies to deal with the applications for funds made to them. He expects loans to be made to farmers in the near future.

Record Best Average Predicted
All records for best average in southern Alberta threaten to be broken by the boards in 1929. Pre-sign-up indications are that there will be over 100,000 acres of land planted to this crop if the spring outlook is at all satisfactory.

Prince Has Turned Author

Writes Foreword To Final Volume Of Merchant Navy

The Prince of Wales has turned author, or at least has written a foreword to the third and final volume of the Merchant Navy by Sir Archibald S. Hurd. The foreword was written in his capacity as Master of the Merchant Navy and fishing fleet, conferred upon him by the fleet last year.

Playing warm tribute to the British mercantile marine, the Prince refers to the thrill that he has always experienced in his world-wide travels at the sight of the red ensign. He refers to the work of the merchant marine in the world war as having provided the final test of a heroism unparalleled in history.

A SPRING TONIC

AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through The Use Of Dr. Williams' Pink Pills

The good old fashion of taking a tonic in the springtime, like most of the old-fashioned remedies, is based upon sound common sense and good medical practice. Winter is always a trying time for those who are not in rugged health. Many men, women and children get weaker in winter on reserve strength they have stored up during the summer months.

It is impossible to be energetic if you are suffering from a lack of blood and nerves at this time to do much for you. A tonic at this time will do much for you. It will give you a feeling of cheer and banishing that first feeling that worries thousands of people at this season of the year.

Farmers Show Interest In Valuable New Book

"Field and Farmyard" Being Distributed Free To Farmers

The new book "Field and Farmyard," which is being offered free to farmers by Imperial Oil Limited, has aroused a great deal of interest among farmers, and is creating for itself a great deal of favorable comment.

The book deals with practical farming problems covering different phases of cropping and cultivating, as well as livestock breeding, and has been judged by a committee of farmers in all sections of the country to be a most authoritative work.

A "Tramp" Of the Skyrays

New British "Plane Built To Carry Bulkier Articles

The bulkiest articles can be transported across the world at a speed of 100 miles an hour in a new British aeroplane which has recently passed the fullest flying tests.

Its spacious cabin body like a railway baggage van, for the machine has been built as a "tramp" of the skyways. It is known as the Vickers Belvedere, and can be used as a freight-carrier, for the transport of troops or as a long-distance bomber.

The two Napier Lion engines have 1,000 horse-power, and with extra tanks to carry additional petrol the machine could remain in the air for between seventy and eighty hours.

Electricity supplies the lighting of this aerial pantechon. The sides and roof are reinforced with wooden stays, and the floor, built up of wood in the manner of the Underground platform coverings, is similarly strengthened.

The Oil Of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but it does so so various that it may be looked upon as a general pain reliever, and is so valuable that it is known for itself and its excellence is known to all who have tested its virtues and gained experience.

Expenditures On Canadian Roads
In 1927 federal, provincial and municipal expenditures on the improvement and maintenance of Canadian roads amounted to \$45,700,000.

Ashtum Cannot Last when the greatest of all asthma specifics is used. Dr. J. D. Kellogg's Ashtum remedy actually dissolves the asthma. It is not to its credit thousands of cases which other preparations have failed to benefit. It brings relief to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

Simple Precautions Against FLU

Sore Throat

The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower, then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—very drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "flu" can be avoided by this simple home treatment.

It is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease-breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

You Actually save money on HEAVIER, STRONGER GATE.

Amazing Gate Value!

As long as you live your Frost Gate will positively defy strain and rust. The entire surface of the frame, the welded joints and fittings are HOT GALVANIZED by our own method used only in the Frost Factory. The fabric has the famous Frost Tight Lock. Provides stronger hinge bolts, clips and other super strength features. This sturdier, heavier gate costs less per pound of its weight. Investigate this astonishing value made possible by Frost methods and tremendous demand.

If there is no Frost dealer in your neighborhood, write to our nearest office.

"What is the meaning of the word 'tantalizing'?" asked the teacher.
Johnnie: "Please, marm, means a circus procession passing the school and the children not allowed to look out."

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of headache or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to reach, and there does not affect the heart. All druggists, with proven directions for use, use which many people have found invaluable in the relief of pains and aches of many kinds.

The Lazy Age

Mechanical Perfection Taking the Place of Manual Labor

One of our contemporaneous philosophers remarked the other day that no generation was ever so strong for suid without scrubbing, heat without stoking and success without thinking."

It is significant that the social economic and mental tendencies of the present day. At the rate at which we are moving today toward the perfection of the "pushbutton-for-what-ever-you want" principle of existence it seems possible that by day after tomorrow we may be getting everything for nothing. No fuss, no exertion, no required mental process that really deserves the name of thinking. The television device will probably be developed to the point of the perfect robot, and we may not even have to push a button to have all our needs efficiently served. Just a word or two in the right key will be enough to make the complicated marvel respond in the desired way. Of course, the greater delicacy is attained in the mechanical nerve centres of the thing a mere whiff of electricity is enough to do the work. The millennium, in physical millennium at least, will have arrived.

We have already achieved the suid without scrubbing, and the increasing popularity of heat without stoking has caused considerable alarm in the coal trade. Certain lines of advertising lead us to believe that suid without thinking may be a fairly developed achievement in the not distant future. Marked progress has already been made in that direction. It is at least possible, of course, to change a considerable amount of our thinking ready-made. Why take the trouble to think when there is such a generous supply of expertly cooked thought available in the open market?

There is a vast amount of encouragement for lazy adults in all this progress toward an easy-going life. The one question that bothers the citizen of a reflective turn of mind is: What under the sun shall we do to occupy ourselves when we have nothing left to do? There is no getting around that fact, however, that humanity likes to be occupied in one way or another even when it has no particular objective in mind. What will be the nature of that success that is to be attainable without thinking?—Providence Journal.

Good Advice About Shoes

Should Be Shined Before Being Worn

Says One Who Knows

New shoes should be shined the first day they are worn in order to get the best wear out of them, according to a man who wears perfectly shined shoes. The reason, he said, is that most shoes are on the shelves a long time and the preserving oils are about dried out. "Many of my customers get a daily shine while others just drop in when they decide their shoes are shabby," he said. "Twice a week is ideal. Then a customer should ask for a 'saddle soap' shine, which means a washing of the shoe and then a polish that contains enough oil to prevent water doing harm to the leather."

In Grandfather's Day

Our poor old grandpa never spoke through a telephone, never heard a gramophone record, desired "Tony" son's idea of aerial travel. In the blue, thought the world was created in six days, believed Mr. Darwin was an agent of the devil and took his glass on occasion. But he raised a family of six, prospered in business, and had the respect of the community. Does anyone need no more?

Contributed By \$200,000

Hops to the value of \$200,000 or 40 per cent. of the Dominion's net profits in the year just closed were contributed by the wine industry of Western Canada, according to C. W. Learmonth, secretary of the Western Canada Livestock Union. Of the total hops sold, 70 per cent. had been within the desired weight of 140 to 250 pounds.

Talking To Automobiles

The 431 Islanders are breaking their spurs and wheeling for automobiles, of which they have nearly 1,400 according to the Vancouver Department. Automobile registration in this freehold island has increased from 18 in 1918 to 1,474 at the end of 1925.

Scotch In The Land

Photography is extremely developing politically. Of the Old Comrades in the Commons there are 11 from Scotland, 10 from England, 4 who claim Ireland as the place of their birth, and 1 Welshman.

Yes, The Police are Very Much

only yesterday I had a very close attack in broad daylight. Pages, Gales, Yverdon.

Sweet Clover As Prairie Crop

Likely To Prove Of Great Importance To The Farming Industry

The introduction of sweet clover into Western Canada as one of the main farm crops is likely to be of great importance to the farming industry. It is not only recognized as a useful crop for improving soils, but it also fits in well with the short rotations that are best suited to prairie agriculture. Sweet clover is not only an easy crop to establish, but the seed can be purchased so cheaply that no great expense is entailed in sowing a considerable acreage with this useful legume.

Sweet clover is an excellent forage crop. Experiments have been carried on at the Brandon Experimental Farm to find out how sweet clover ranks with corn when both are made into silage for milk cows. In his report for last year, published by the Department of Agriculture, at Ottawa, Superintendent Tinline tells of an experiment that was conducted with a herd of milking cows during a period of nine weeks. The cows in Group 1 were fed corn silage during the first and third periods, and sweet clover in the second period. The cows in group 2 were fed sweet clover during the first and third periods, and corn silage in the second period. The corn silage was of good quality made from Northwestern Dent corn that contained an average of 16 per cent. of moisture.

The sweet clover used in the silage was cut when about fifty per cent. of plants were in flower. The silage was very well packed in milk and the body weight gained by the cows when fed on the different ration. The corn group slightly outperformed, yielding 1.3 pounds more milk per day than when the sweet clover silage was fed. The sweet clover silage proved best for putting weight on the cows, which in this case were approaching the end of their milking period. The average milk gain was slightly more than one-quarter of a pound more than those getting the corn silage.

Expert Poultry Raiser

Michigan Man Has Installed Latest Methods in Poultry Raising

Twenty-two years ago a modest school teacher of Romeo, Mich., the son of a chick raiser, brought out his first batch of chickens with 24, then just scratching. A year later he sold a cow and with the money entered the first poultry show. He was offered a State College, then Michigan Agricultural College, at East Lansing.

Today W. A. Downs has his 1929 hatch under way, which will include more than 250,000 chicks. He intends placing a part of them in three or four weeks in a new scientific brooder which he has installed—the only one of its type in Michigan.

Downs has spent his life and his research in the raising of chicks, and says, "It just comes natural. My father was a poultry man, starting 20 years ago, and I have carried on his work."

Downs' new brooder, with a capacity of 100,000, is a complete ventilation chambers and heating apparatus worthy of the most complete hospital or health center.

In the chicks are raised for the first three or four weeks under the best possible conditions, in order that they can be of high efficiency later.

According To His Idea

Three men were discussing the merits of the world's greatest inventors. One spoke loudly in praise of Morse, while the other two favored Edison and Marconi.

An old gentleman sitting close by ventured the following remark: "Well, gentlemen, if you'll excuse me interjecting, I might tell you of a fellow who invented electricity was no fool."

Makes Notable Flight

When "Punch" Dickens, Edmonton bird, brought his monoplane to a landing on the Edmonton flying field the other evening he completed a notable flight of 1,000 miles in the first circle above on the rim of the Arch Creek. The plane carried a valuable cargo of four of the most northern prairie.

Taking To Automobiles

The 431 Islanders are breaking their spurs and wheeling for automobiles, of which they have nearly 1,400 according to the Vancouver Department. Automobile registration in this freehold island has increased from 18 in 1918 to 1,474 at the end of 1925.

ACTION PROTESTED

The Canadian schooner "Tin Alone," the sinking of which by United States coastguards off the Louisiana coast in the Mexican Gulf is causing a dispute as to whether the action of the coastguards was justified. The skipper Capt. Randall, a Nova Scotian, states he was sunk off the American coast outside the 12 mile circuit and in international waters. The ship is reported to be of Canadian registry.

Fish Fry Co Free To Quebec Waters

National Railways Helps Conservation

To assist in the conservation of game fish in the waters of the Province of Quebec, an arrangement has been reached between the Canadian National Railways and Mr. L. A. Richards, Deputy Minister of Mines and Fisheries, whereby the Canadian National Railways will handle shipments of fish fry from the Provincial Government hatcheries to points on the system within the province.

At the present time, four hatcheries are operated by the provincial government, at St. Alexis des Monts, Lac Tremblant, Gaspé and Badville. Efforts toward the conservation of game fish will be the principal cause of these hatcheries at present, later it is anticipated that other game fish will be included and an energetic campaign of re-stocking waters at the various points along the Canadian National lines in the Province of Quebec will be carried on.

Most Absent-Minded

"Where's the car, dad?" asked the son of an absent-minded professor. "Why, dear me," he said. "I really don't know. Did I take it out into the town?"

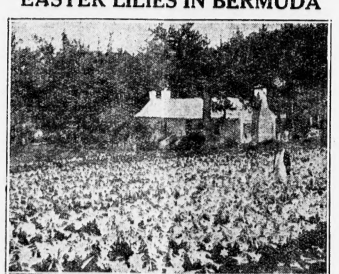

"You certainly did. You drove it into the town."

"That's very remarkable," replied the professor, "remember now that after I got out I turned round to thank a gentleman who had given me a lift and wondered where he had gone."

Most Valuable Oil Wells

"Tarrant Valley has produced in Home No. 1 and Royalty No. 4, the two most valuable wells in the British Empire," said Stanley Davis, formerly petroleum engineer for the Dominion Government. "Royalty No. 4 has produced over \$1,000,000 in a year for 4½ years and Home No. 1 has started off with a larger production than Royalty No. 4."

EASTER LILIES IN BERMUUDA

Bermuda, where the Easter lilies come from, is on the route of the Canadian National Steamship West Indies Service, which was inaugurated in December. The new steamer will mail service between Canadian Atlantic ports and the picturesque ports of the Spanish Main. The first vessel of the new fleet, which when it is in full operation, will consist of five vessels, was christened "Lady Nelson."

The lilies are also named after the famous British seaman, Captain Nelson.

Age Told By Rings

Study Of Life History Of Halibut Is Most Interesting

The age of the halibut, one of British Columbia's most important food fish, is determined in much the same manner as the age of trees—by the rings. But instead of cutting the entire fish to ascertain the number of rings in a cross section of its body there is a more interesting method of finding in the ears of the halibut, according to J. P. Babcock, chairman of the International Fisheries Commission, and a well-known authority on the habits of the halibut.

Mr. Babcock says that during the last few years the commission has collected many specimens of halibut larvae much smaller and younger than any previously known and that it has been possible through these discoveries to study the life history of the halibut much more thoroughly than ever before.

"How long the young fish swim upright and when and what changes before the halibut acquires the habit of lying on one side, with its head tipped sideways, both eyes on the upper side, is unknown," says Mr. Babcock. It is one of the most fascinating problems on which the commission is engaged. It is one of the most engaging problems in marine biology.

"In recent years there has been no branch of fishery science as rich in results as that of the study of age and rate of growth. In the case of salmon we may determine the life by checking up on the length of time spent in fresh water, the time in the sea and the river in which it is hatched. But this is the way we determine the life of the halibut. The halibut has an inner ear but no external ear. In the ear a stone is developed which grows in size from year to year by deposits from the outside. The winter growth is more marked than the summer growth, making a stone which is marked like the rings of the tree. The bones are called otoliths, or ear bones and these are used to determine age."

"The scales of the halibut also show growth rings, but they are so constructed as to make it too tedious to determine the study of ear bones. Halibut mature in their eleventh year and we have records of halibut living until forty years of age. The growth of the halibut is slow, but they ultimately grow to great size. Females sometimes reach 500 pounds. Males do not attain more than 100 pounds in weight even at the age of thirty-five years."

Would Be Hard Job

Aviators who have had little to deliver in Harrisburg, Pennsylvania, must put them under the doors of the houses. How they are to accomplish this does not matter to Chief of Police Thompson. A barrage of yellow circles dropped over the city by an aeroplane aroused the chief's ire, and he dug up an old ordinance which requires hand bills to be placed under doors to prevent them blowing on the streets.

The Backward Trend

Her father: "But, my boy, you are young to marry my daughter. You are but twenty-one and she is twenty-three."

Son: "But, Sir—"

Father: "No, at present the disparity is too great. Better wait half a dozen years. Then you'll be twenty-seven and she'll probably be about the same age."

Toll rates through the Panama Canal approximate \$1,600 on hour.

Yukon Man Makes Heads

Of Prehistoric Ivory

Ivory From Mastodons, Fifty Thousand Years Old Converted To Use

On one of the steamer which ply on the enormous Yukon River, between Whitehorse and Dawson, there is an engineer named Jack Elliott. The story is full of stories. There are few more interesting than the story of Jack Elliott. It is not one of the yarns of a man who has claimed that he has found a new ivory; it is not the tale of an accident that unearthed treasures too great for the strength of man. It is not the romance of a heavy piece of gold dust lost on one throw of the dice; it has nothing to do with gold; all Jack Elliott did not travel the trail of '88. He went to the Yukon when the first flush of the fever had passed.

He found another treasure. It is the story of ivory. It begins in the days, so dim that men can never quite comprehend them, when the physical sciences were in their infancy, incidentally pointing out that the Hudson Bay route penetrates deeper into the interior of Canada than does the Interior Highway, the coast route. An historical sketch reminds the reader that this northern part of Canada has had a longer tenure under the Lewis and Clark expeditions of the North American continent. Climate and precipitation are factors in the history of the Hudson Bay route.

A gist of the known data respecting natural resources is contained under the various sub-headings of the Hudson Bay route. The section under transportation deals with the building of the Hudson Bay Railway, the advantages of Churchill Harbor, the investigations being made respecting ice conditions in the Hudson Bay, the construction of branch lines made necessary by mining developments.

There is a selected reading list appended for the benefit of those who wish to pursue the subject farther. The text is illustrated by three full-page reproductions of the Hudson Bay Railway, the coast route, embracing a wide range of typical views. The typographical work is especially well executed.

Sugar Syrup For Bees

New Postal Regulations To Encourage Bee Keeping In Canada

In order to encourage the beekeeping industry in Canada the Canadian postal regulations are being amended to permit the mailing of honey bees being sent by mail when fed with sugar syrup as allowed by the United States Postal Service. The new regulations in Canada demanded the use of a certain quantity of sugar syrup as food supply for bees, and this is now being supplied by the action of the Canadian Post Office Department in changing the regulations to permit the mailing of honey bees as food supply for bees. The action of the Canadian Post Office Department in changing the regulations to permit the mailing of honey bees as food supply for bees is a very satisfactory for bees as sugar syrup.

The action of the Canadian Post Office Department in changing the regulations to permit the mailing of honey bees as food supply for bees is a very satisfactory for bees as sugar syrup. The action of the Canadian Post Office Department in changing the regulations to permit the mailing of honey bees as food supply for bees is a very satisfactory for bees as sugar syrup.

Thousands of packages of bees are annually imported into Western Canada every spring, principally from Alabama and other Southern States.

Dynamics For Moscow

Henry Ford's Edison memorial museum, built as a tribute to the motor magnate's close friend, Thomas Edison, will contain the world's first practical commercial light and power system, which lighted several homes in Sunbury, Pa. years ago.

The old Sunbury dynamo and engine still are in New York, but will be moved to Ford's museum at Menlo Park, N.J., according to F. A. Wardlaw, curator of the Edison historical collection.

His Mistake

Curtis: "How many cases did you try yesterday, Judge?"

Judge: "Only one. It lasted all afternoon."

Curtis: "Important, I suppose?"

Judge: "No. It was a woman arrested for speeding and I was too tired to ask her what she had to say for herself."

"One Woman" remarked the other

"No, just as good as another."

"And one man" rejoined the wife.

"No, just as good as another."

The Hudson Bay Region

Valuable Pamphlet Deals With Important Developments In

Current undertakings initiated by the Canadian Government for the speedy completion of the Hudson Bay section of the Canadian National Railways and the construction of Churchill instead of Port Nelson as a terminal report have revived public interest in the Hudson Bay region. Physically and historically this region is of outstanding interest in Canadian development. To meet the demand for authentic and up-to-date information respecting it, the Natural Resources Intelligence Service of the Department of the Interior has issued a 50-page pamphlet entitled "The Hudson Bay Region."

The subject matter is treated under four headings—general description, natural resources, mining developments, and transportation. The physical features are briefly described, incidentally pointing out that the Hudson Bay route penetrates deeper into the interior of Canada than does the Interior Highway, the coast route. An historical sketch reminds the reader that this northern part of Canada has had a longer tenure under the Lewis and Clark expeditions of the North American continent. Climate and precipitation are factors in the history of the Hudson Bay route.

A gist of the known data respecting natural resources is contained under the various sub-headings of the Hudson Bay route. The section under transportation deals with the building of the Hudson Bay Railway, the advantages of Churchill Harbor, the investigations being made respecting ice conditions in the Hudson Bay, the construction of branch lines made necessary by mining developments.

There is a selected reading list appended for the benefit of those who wish to pursue the subject farther. The text is illustrated by three full-page reproductions of the Hudson Bay Railway, the coast route, embracing a wide range of typical views. The typographical work is especially well executed.

Copies of this timely pamphlet may be obtained free on application to the Director, Natural Resources of the Department of the Interior, Ottawa.

Rescued In Mid Ocean

Dutch Seaman Attempted To Cross Atlantic In Lifeboat

Captain Johannes J. Schuitmaker, 25-year-old Dutch seaman, his first mate, Francis Meyer, and his second mate, Cornelius A. Vanderlaan, arrived at New York from San Juan, P.R. in the steamer S.S. S. Lorenzo with the 20-foot lifeboat. When they set out from Lisbon to cross the Atlantic February 8.

In reality, not thus a year has elapsed since they began their journey from Rotterdam to New York. They were nearly shipwrecked in the Bay of Biscay in February, 1926. They repaired their boat in Lisbon and finally set out across the Atlantic in the lifeboat. On March 18 they were picked up in mid-ocean, half-starved and without drinking water, by the Spanish mail ship Marquesa de Comillas.

Apology Accepted

During a discussion at a meeting of the Association of Assistant Mistresses in London, a member told a story of two boys who were heard making friends after a quarrel. One boy said, "Of course, Charlie, when I called you a liar and a coward, I did not mean it as an insult, only as a statement of fact. The second boy replied: 'Well, if that was all, it does not matter.'"

Hatching Eggs Go To China

Incubated eggs are being shipped in large quantities to the S.S. "Empress of France," bound for China. The consignment is being handled by the Canadian Pacific Express Company. The eggs are from the best breed of Leghorns and are all hand-picked and electrically examined.

"She Lives in Redmayne Street. I

do not remember the number, but you can easily find the house—it is the house where the Canadian Pacific Express Company is located."

Oil Production

Sets New Record

Establishing a new high mark in the history of the province, oil production delivered to the refineries from wells in the Turner Valley field during the month of April reached the total of 69,307 barrels. This production shows an increase of 12,600 barrels over that of the preceding month, the gain being largely contributed to by an increased flow from Home No. 1, Royalty No. 8, Dalhousie No. 1 and Okalta No. 1 wells.

Weather permitting the Acadia Valley field team will be here on Saturday.

New Ford Assembly

Plant in California

The Ford Motor Company are building a new assembly plant, docks and transfer ware house in Southern California. It will consist of two units, a single storey assembly plant, 320 feet long by 300 feet wide with a single storey office building and a two storey transfer warehouse 440 feet by 80 feet. Total floor space will be in excess of 350,000 square feet.

The east-bound passenger train, now leaves Empress at 7:10 a.m., daily.

In Old Kentucky

A revenue officer was trailing a Kentucky moonshiner, arriving at the former's home, there was only the small sun around. The following conversation took place:

Officer: "Where is your pot?"
Small Boy: "In the hills making whiskey?"

Officer: "I'll give you 50¢ if you take me to him?"

Small Boy: "Give it me now."
Officer: "I'll give it you when I get back."

Small boy: "You give it to me now! Mister, you ain't coming back."

—Blackie.

Irisia Tuckor returned on Friday from the States where he spent the winter months. He brought back some specimens of cactus and plant life and minerals from Death Valley, California.

300,000 Unfilled Orders

Edsel Ford, who sailed recently for a seven weeks combined business and pleasure trip, said before sailing: "Our activities both here and abroad are moving satisfactorily, and we are more than satisfied with the progress being made. Production of the new model Ford is running at the rate of 3,000 a day, and at the present time unfilled orders on the company's books amount to 300,000 cars."

Foundation of National Culture

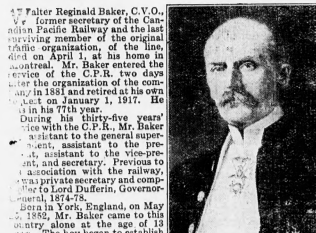

Two new Canadians from Roumania demonstrate the art of weaving at Regina.

Those who have in the past regarded the New Canadians from Europe as hewers of wood and drawers of water must, after the recent demonstration at the Great West Festival at Regina, admit that these people have, with their native arts, decidedly enhanced the cultural wealth of the country of their adoption. J. Murray Gibson, who sponsored the festival under the auspices of the Canadian Pacific Railway, even goes so far as to say that Saskatchewan and the other prairie provinces have within their borders the foundation of a National culture, finer than that of any other nation on earth. To this foundation, the first and for which had been turned at the previous festival at Winnipeg, all the races which go to make up the peoples of the west have contributed—Inlanders and Irish with their folk-songs and lore, Swedes and Slavs alike with their folk-rails and dances, hardly a race known to civilization, old or new, but contributed to the festival some artistry which will make for the further development of that culture which, being national, will be the means of welding to a still greater solidarity, these people who are Canada.

That the movement for the attainment of this end is a popular one was demonstrated by the fact that literally thousands were unable to obtain admission to the exhibits and concerts and that western cities are vying with one another as to the site of the next festival.

Was Honored for Service to Royalty

Lee W. R. Baker, C.V.O.

Mr. Baker, former secretary of the Canadian Pacific Railway and the last surviving member of the original traffic organization of the line, died on April 1, at his home in Montreal. Mr. Baker entered the service of the C.P.R. twenty days after the organization of the company in 1881 and retired at his own request on January 1, 1917. He was in his 77th year.

During his thirty-five years' service with the C.P.R., Mr. Baker was assistant to the general superintendent, assistant to the president, assistant to the vice-president, and secretary. Previous to his association with the railway, he was private secretary and comptroller to Lord Dufferin, Governor-General, 1874-75.

Born in York, England, on May 25, 1840, Mr. Baker came to this country alone at the age of 13 years. The boy began to establish a career for himself early, and, after passing through several stages of progress towards success, found himself, at the age of 22, vice secretary of His Majesty's representative in the Dominion.

He became secretary of the Treasury Department and was assistant secretary of the Treasury at Ottawa just before the C.P.R. was organized. In the historical organization of the railroad, Mr. Baker was one of the principal actors. Before he died, the former secretary put down on paper, as the last act of his life, the last act of his long and eventful career, just what were the circumstances surrounding the beginning of the great company's organization. The company was formed on February 15, 1881, and the organization meeting of the board of directors was held two days later. Charles D. Brown was named secretary of the company; the first official to be appointed, according to the account of the historical events as related by Mr. Baker.

Mr. Baker's story

Duncan McIntyre, later first vice-president of the company, was a member of the "Syndicate" which had planned the organization of the C.P.R. He had made a promise to Mr. Baker some time before that, if the Canadian Pacific

in his autobiographical account, "So, I said at once 'I will go wherever you want me to go.'"

On the way to Winnipeg there were short stops at Chicago and St. Paul, where Mr. Baker had an opportunity of looking into the American system of railway accounts. A special train took the party to Winnipeg. Those with Mr. Baker were: A. B. Stickney, general superintendent, William Harder, assistant traffic manager, Joel May, superintendent, and F. C. Butterfield, master mechanic.

"This party was the original traffic organization of the Canadian Pacific Railway," Mr. Baker recorded. "Before we arrived at Winnipeg, we continued. 'Mr. Stickney decided that he wanted me to act as his assistant and I was accordingly appointed to the position of assistant to the general superintendent.'"

Various Appointments

In Winnipeg, Mr. Baker held several positions successively in the C.P.R. He was purchasing agent, assistant to general manager, local treasurer, assistant to general superintendent, executive agent and held several other positions. He was also in charge of the Manitoba and North West Railway. In his last position at Montreal. On that occasion he was provided with a solid foundation for his business community of the western city.

During his connection with the railway, Mr. Baker came into contact with several royal personages. He was in charge of the royal train over the C.P.R. lines during the several visits of the Prince and Princess of Wales, now the reigning monarchs; Prince Arthur of Connaught, and Prince Fushimi. In return for his services to these royal visitors he was presented with several testimonials and titles were: Commander of the Royal Victorian Order, Commander of the Order of the Star of Japan, Knight of the Order of St. John of Jerusalem and Freeman of the City of York.

His last audience was with the King George, and it was at this time that Mr. Baker said: "I am going to the end of my journey."

Good
Blue Ribbon Tea
Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavor is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

Canada's Opportunity and Responsibility

It has been said times without number that Canada occupies a paramount and responsible position as interpreter of Great Britain to the United States, and of the United States to Great Britain. Such views have been expressed, not so frequently by Canadians themselves as by leading men in Great Britain and the United States.

Within the past few years the opinion has been expressed by leading citizens of the Empire and of China, Japan, and other oriental lands, that Canada, because of its geographical position and its rapidly expanding trade across the Pacific, likewise occupies a strong position as interpreter of the Orient to the rest of the Empire. Canada is popular in China and Japan as compared with the United States and European countries.

In the councils of the League of Nations this Dominion also stands high, and deservedly so. It is recognized by other countries, and more particularly the smaller nations, that Canada has no selfish purpose to serve through its membership in the League; that, on the contrary, the Canadian attitude is one of disinterestedness based solely in a desire to render service to mankind. The Canadian position in the League has always been for peace, conciliation, recognition of the rights of others, and, especially, not merely fair treatment but open generosity and sympathy for minorities.

Because of this unselfish attitude, Canadians are welcome in all lands, and the high opinion entertained for this country is proving a real asset to the business and commercial interests of the Dominion in the opening and development of foreign markets for Canadian products.

Now, one of the most influential men in India, Sir Rahabadrath Tagore, the world renowned poet, outlines to Canada a duty which rests upon this young Dominion, not only to itself, or to a group of nations, but to the world. Sir Rahabadrath was a distinguished guest and speaker at the recent Conference of the National Council of Education held at Vancouver, and in his farewell message to Canada he gave expression to views which Canadians everywhere may well read, ponder over, and to which they should give heed.

"Canada," he said, "is too young to fall a victim to the malady of disillusionment and scepticism, she must believe in the great ideals in the face of contradiction—for she has the great gift of youth; she has the direct consciousness of the stir of growth within her which should make her trust herself, and believe in the only future of the world."
How true this last sentence! A man or a nation which does not trust himself or itself, but lives in an atmosphere of fear and suspicion, can never trust others.

Continuing, the great Indian savant said: "Let Canada feel the sacred dawn of her life, that the expectation of human destiny is upon her as upon other sister countries which have just entered into the cycle of their promise. Canada will have to solve for the salvation of the man the most difficult of all problems, the race problem, which has become insistent with the close contact of communities that had their isolation for centuries in their geographical and cultural exclusiveness. Canada will have to reconcile the efficiency of the machine with the creative genius of man which must build its paradise of self-expression, reconcile peace with religion, individual right with the social obligation that it must acknowledge. She must dream of the introduction of honesty even in politics, which is the self-interest of the nation, and she must find the basis of her new life in the foundation of international friendships. She must ever hope to be able to win the heart of the world by offering the best that she produces."

Although his actual knowledge of this country was limited, Sir Rahabadrath said Canada possessed powers of spiritual and material resources that would enable her to carve out a destiny free from "the fatigue that old civilizations suffer from in the shape of cynicism."

This is an inspiring vision of Canada's place in the world. It is one that calls for the best that every citizen, regardless of his race or creed, can contribute. And it is because the Canadian people of tomorrow will be a development of the cosmopolitan population of today that the Canada of the future will find within itself the ability, the sympathy, the international viewpoint, which will make possible such a great contribution to the future of mankind and the ultimate and lasting peace of the world, for, until the race problem is solved there can be no peace in any country, or in the world at large.

Sleepers in Buses

Line Between Buffalo and Cleveland

Has Comfortable Berths

A bus with sleeping accommodations was exhibited in New York recently. It has gone into service between Buffalo and Cleveland, according to the Great Lakes State Line, which operates between those cities and Philadelphia and New York. The bus will accommodate eighteen persons in six double and six single berths, all with outside ventilation. An electric ventilating system changes the air every five minutes.

From Youth to Age

There are three trying periods in a woman's life when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these three times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

Ontario Man Inherits Title

Will Go To France To Take Possession Of Property

Count Richard du Manoir de Jauvay has lived for 25 years in one half of a frame house in the village of Westmeath, near Pembroke, Ontario. All that time he has known he was next in line to the family estates and titles, together with the famous old Norman chateau. The property which has now fallen to the Count on his succession to the family title is situated near Bayeux and it is his intention to leave Westmeath for France and his ancestral home together with the Countess and their son and heir.

The Count, who acted as house painter and general handy man in the unpretentious village of Westmeath, was known as Richard Du Manoir. This is the second European title to be inherited by a Canadian within the past few weeks, the other case being that of the Earl of Egmout former rancher of Priddis, Alta.

FEELING TIRED AND DEPRESSED

Then Try The Treatment With Dr. Williams' Pink Pills

It is good to be tired after hard work or play. Tired and food will build that kind of a useful fatigue. But to be weak all the time never to feel strong, that is a different matter. It is a condition that must be corrected or worse results will follow. Such a condition the doctors term anaemia, and is caused by thin blood. For relief in this condition, equal results, equal health, Dr. Williams' Pink Pills, which enrich and purify the blood, bringing new blood to the system. Among those who have found new health through the use of these pills is Mr. C. H. Hooton, R.R. 4, Egin, Ont., who says: "For a long time I was greatly disturbed with pains in my back and felt tired and depressed most of the time. My blood seemed to be in a bad condition, no matter what I ate. I slept poorly and scarcely felt like eating. I tried a doctor, but his treatment did not help. Then one day I read an advertisement of Dr. Williams' Pink Pills, describing a cure much like my own, and I decided to try this remedy. I took the pills for about two weeks, and the result was wonderful. I gained fifteen pounds in weight and felt like a new man. I know of nothing that will build up the strength like Dr. Williams' Pink Pills. I have since recommended them to many of my friends."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or direct from Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box. Write today for a copy of the free booklet, "Building Up the Blood."

We'd not only rather be right than President of Mexico, we'd rather be most anything you could mention, except maybe judge at a baby show.

Use Minard's Liniment for the Flu.

The longest and deepest canyon in the world is the Grand Canyon of the Colorado River. In some places it is more than a mile deep.

Are You Ready

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss J. L. Dorey, nurse at St. Mary's Hospital, 3250 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with pain. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, and it has calmed and burned, and have the greatest success in it."

Zam-Buk

Explore Arctic For Minerals

Sergeant Clay, Supernumerary

Staff-Sergeant Sidney

of the Royal Canadian Mounted Police

left Toronto recently on route to the Arctic Circle. He is superannuated from the force having served 27 years, and is going back to the Arctic regions not with the Mounties but with private exploration interests.

For several years he was in charge of the farthest north outpost of the R.C.M.P. On his first northern trip he started for Edmonton with dog teams and canoes as his only means of transport. This time aeroplanes and motor sledges will be used.

The object of the expedition is to explore for minerals. The country round Chesterfield Inlet, according to Clay, is the wealthiest in the world. They are carrying a motor-plane outfit with them. For the past three years Clay has been a successful fruit-grower at Grimsby.

Strangled With Asthma is the only cure for asthma.

What is endured from an attack of this kind is the result of Dr. J. Kellogg's Asthma Remedy.

Where all was suffering there comes comfort and rest. Breathing becomes normal and the troubles are completely cleared. This unequalled remedy is worth many times its price to all who use it.

Ship Muskates To North China

Eight thousand live muskates are to be shipped from the Swan Lake Farm, Quebec, B.C., this summer. It is stated by officials of the company, Three Thousand are to go to North China and smaller numbers to England, Scotland, and other parts of the continent.

The Swan Company estimates that it has a total of 50,000 rats in its farm.

Ready-Made Medicine—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchitis, troubles, it is invaluable. For scalds, burns, bruises, sprains it is unsurpassed. For tooth aches, sore and swollen gums, it is a most effective remedy. It is a most effective remedy. It is a most effective remedy.

Growth Of Tree-Planting

Eight Million Young Trees Planted Annually In The West

In connection with the distribution of trees to prairie farmers in Canada, the annual report of the Tree-Planting Division of the Forest Service, Department of the Interior, it is interesting to note that each spring nearly 8,000,000 young trees are sent out; shipment of these trees require 24 carloads of moss and nearly 10 miles of 45-inch hauls. Before many years are gone, the "treeless prairie" will be a thing of the past.

Garnet Wheat Train Shipment

Between 4,000 and 5,000 bushels of wheat has been shipped overseas, for sale in four-months and joint arrangements of the Dominion Department of Agriculture and the Canadian Wheat Pool. The future of this type of wheat will largely depend upon whether this present lot meets with favor among the millers of Great Britain and Germany.

An Oil Of Meat—Dr. Thomas' Electric Oil is not a bundle of chemicals, but a bundle of natural substances thrown together and pushed by advertising, but the result is the careful investigation of the healing qualities of certain oils and their application to the human body at rare combination and it won and kept public favor from the first.

One of it will carry conviction to any who doubt its power to repair and heal.

Employer—"Can you show a recommendation?"

Job Applicant—"Why, er, I am recommended to mercy by a fry once."

Even a man of steel may lose his temper when he gets hot.

Minard's Liniment for Coughs and Colds.

Talking Postcards

Latest In England

Will Be On Sale Shortly At Three Pence Each

"Talking Postcards" will in future, make it possible to dispense with ordinary printed greeting cards at Christmas and on birthdays. The latest novelty is a very small gramophone record printed on a picture postcard. It is about three inches in diameter and looks like a thin brown filament, but is shaped and marked like an ordinary record. It can be put on the market shortly at three pence each and there is to be a great variety of them. At present, there are only two, one called "Annie Laurie" and "Auld Lang Syne," special holiday numbers and a romantic declaration of never changing love. Large records, also, are stamped on calendars, and there is scope for further development of this invention in many different ways.

At forty a man wishes he knew what he thought he knew at twenty.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACT.

Shoe with a sharp edge of PUTNAM'S stops the pain. A few applications make the corn dry and it drops off. Putnam's Corn Extract gives instant relief for corns, blisters, and other foot troubles.

Putnam's Corn Extract is sold everywhere. It is a sure cure for corns.

Canada's Mining Advance

From a comparatively obscure position in 1909 with a production of less than \$500,000, Canada is steadily advancing to the front rank of the mineral-producing countries of the world with a total production in 1925 valued at \$271,000,000.

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brookes, Monro, Que.

"For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

MILBURN'S NERVE PILLS

and I got a box, and in no time I felt better. So I took three boxes more and I have never had shortness of breath since."

Box 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Employees in German mines have increased in the past few years from 100,000 to 200,000.

The indications of worms are restlessness, grinding of the teeth, picking of the nose, extreme liveliness, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little return will be immensely eased and the sufferer of the attack will not be likely.

Northern Ireland now has two and one-half miles of highway to every square mile of land.

Every British Dominion Has An Independent Function In The League of Nations Body

One fact which has been made clear by the recent session of the League of Nations at Geneva is that Canada and every British Dominion has a definite and independent function in that body. Despite the conditions under which this country entered the League and the World Court, there still remains in the minds of some European statesmen the erroneous idea that Great Britain is the spokesman for the whole Empire.

Several episodes during the last session brought this subject to the fore, and in each case, to make the position of the Dominions abundantly clear. One of these had reference to the World Court, when exceptional was taken by some European delegates to a British Dominion being separately represented even if the question dealt with was of paramount importance to that Dominion.

Such a contention is absolutely contrary to the whole basis of Dominion inclusion in the League and the World Court and the British delegate, Sir Cecil Hurst, replied very forcibly with the statement that even if an English judge was on the court, the Dominions would have the right of representation should it be dealing with a question which directly affected their interests.

Neither Canada nor any of the other governing Dominions have recognized the right of Motherland delegates to vote or speak for them, and the sooner this is clearly understood by all member states of the League, the sooner will progress be made in matters affecting our interests.

Canadians are heart and soul behind the general idea and ideals for the maintenance of world peace by the League, but they will never be satisfied to take any position of inferiority in its councils, or relegate their vital interests to any one but their national representatives.

Prospects Brighten In Maritime Section

Betterment In The Economic Conditions Now Apparent

Since the first of the year, there has been an increase in car loadings for the Atlantic region of the Canadian National Railway of 5,100 cars over the same period last year. This forms a very good index as to the economic conditions of the Maritime. Numerous large works have been undertaken including pulp and paper mills and additions to hydro-electric plants. The cold storage facilities at Halifax are rapidly nearing completion and they will bring Halifax in line with the most modern ports on the Atlantic seaboard. A cold and dry storage warehouse is also under construction at Moncton, and this should prove a very valuable addition to the facilities for the handling of products requiring this class of storage. Altogether the prospects look very bright for the continuance of the betterment in the economic condition of the Maritime provinces. Various mining developments are under way and there has been considerable increase in capital investments both for new buildings and for additions to existing plants.

Sure To Hear Of Them

Pathologically, the infatuated young man sought counsel at the bazaar of an ancient and prayed that the ancient tell him how he might learn of his fair lady's faults.

"Go forth among her women friends," spoke the venerable sage, "and praise her in their hearing."

"Is he mean?"

"Mean! He's no mean that if he were a giant he wouldn't give you a fight."

"Why is baby's bed so high?" "My husband and I sleep soundly and it is to hear him if he falls out in the night." Lustige Kolner, Zeilung, Chicago.

W. N. U. 1781

Western Man Promoted

W. E. Watson, Well-Known Livestock Man, Appointed Manager Of Montreal Livestock Yards

W. E. Watson, one of the best known livestock men in western Canada, and for some years past a prominent official of the departments of colonization and agriculture of the Canadian National Railways, has been appointed to the management of the Montreal Livestock Yards, succeeding Mr. G. J. Tansy, who has resigned. The announcement was made by Major F. L. C. Bond, on behalf of the stockyards company. Mr. Watson having taken over his duties on April 1st.

Mr. Watson is a native of Grey County, Ont., but came west many years ago. He is a graduate of Manitoba Agricultural College, and for a number of years was attached to the Manitoba Department of Agriculture. Later he joined the Dominion Livestock Branch as a swine grader for the provinces of Alberta and Saskatchewan. In February, 1924, he joined the departments of colonization and agriculture of the National Railways, at Winnipeg as assistant agricultural agent, and in 1925 was advanced to the position of agricultural agent. In 1926 he was appointed superintendent of the department of agriculture for the National System for the district of Saskatchewan. He has since been transferred to the Winnipeg offices of the departments as superintendent of the department employment, which position he occupied until going to Montreal.

Approved Dairy Herd Sizes

Reports Of Canadian Record Of Performance Guide To Securing Good Animals

Owners of dairy herds looking for sizes bred from high producing stock would find great assistance in locating suitable animals in the reports of the "Canadian Record of Performance Pure-Bred Dairy Cattle." This publication, issued each year by the Live Stock Branch of the Department of Agriculture, at Ottawa, gives the records of the hundreds of cows tested during the year that reach the standard for registration. The breeds thus tested include the Ayrshire, the Brown Swiss, the French-Canadian, the Guernsey, the Holstein-Friesian, the Jersey, the Red Poll and the Shorthorn. In all these breeds provision is made for the registration of bulls, which are admitted after having four progeny in the record of Performance, each from a different dam. Report No. 20 of the "Canadian Record of Performance" contains the names and registered progeny of a large number of sires. By referring to the pages of this report one may discover that there are quite a number of home-bred herds from which they may strengthen their milking herd or secure a sire of approved breeding.

Our Potential Wealth

Canada, Destined To Be The Richest Country In The World

In a recent article written for a Toronto financial paper, James E. Boye, Professor of Agricultural Economics at Cornell University, states:

"Canada is a country of vast virgin resources. The United States is sometimes spoken of as the richest country in the world, due to the immense progress of both agriculture and industry in that country. It is, however, that Canada is a country of larger area, and of far greater wealth in natural resources and capital. With a balanced development of Canadian resources, coupled with an equally balanced development of those two great arteries of economic life—transportation and landings, Canada is destined to be the wealthiest country in the world. All her exports per capita have a value four times those of the United States."

Males No Difference

The average time, the New York Telegram points out, taken by a fast railroad train to pass a grade crossing is seven seconds—whether there happens to be anything on the crossing or not.

The secret of life is not to do what one likes, but to try to like what one has to do.

A League of Nations committee has set the cost of the World War at \$502,000,000,000.

Spring Song

"What a fight that fellow gave!" And so on, into the night. This is one of several photographs published by the Tourist Department of the Canadian Pacific Railway to remind the unhappy angler that "Spring has come—and all the streams are open." Photographed near Lake Umbagog, north of Montreal.

Will Attract Hunters

Plenty Of Big Game To Be Found In Alaska

As a big game country, Alaska comes a close second to Africa, despite its lack of lion, elephant and rhino. Furthermore, it is likely to attract hunters longer than the latter terrain, for here is less annual "cleaning up" of a district.

What is even more important to the territory back of Anchorage and the Alaska railroad are plenty of moose, caribou, mountain sheep and goat, and black and brown bear. What is even more important to the ordinary hunter—it costs less to hunt for the Alaskan hinterland than to attempt Nairobi.

Building Two Ways

The statement made at the convention of contractors held in Hamilton that material used in construction was now almost entirely of Canadian origin and manufacture was something to enhance our pride. We build two ways when we build that way.

A Hazardous Occupation

Natural Scientists Face Many Dangers In Tropical Jungles

Pursuit of moths and butterflies in the tropical jungles of Ecuador is a hazardous occupation, according to W. Hudson Coxe, member of the Philadelphia Academy of Natural Sciences, who returned from a protracted expedition.

Coxe told of meeting bird-eating spiders the size of dinner plates and killing venomous reptiles in the haunts of rare and beautiful butterflies. One of the spiders encountered, Coxe said, he was forced to shoot with a revolver as it was about to spring at him.

Leafhoppers which give no warning when attacking, were brought back by the scientist. They are known as "Eco" or "X" ankers because of their markings and have "rattle" which make no noise.

First Flapper—I say, your brother can dance. Second Flapper—I know. Our lord's been the making of that boy.

Work of Preserving Law and Order is Large Assignment in Our Vast Northern Empire

RECEIVES NEW APPOINTMENT

R. D. PURDY

The Alberta Wheat Pool announced the appointment of R. D. Purdy as manager of Alberta Pool Elevators Limited, to succeed C. M. Hall, retired. Mr. Purdy has been manager of Alberta Wheat Pool Organization since January, 1925, and this change makes him manager of the subsidiary organization known as the Pool Elevators, as well. Alberta Pool Elevators operate more than 300 country elevators in Alberta, as well as three terminals on the Pacific coast. Mr. Purdy came to the Wheat Pool from the Bank of Montreal, he having been assistant manager of the Edmonton branch. He was born in Brighton, Ontario, and came West in 1906. He served twenty years with the banking business before coming to the Pool.

Manitoba To Have

Airplane Factory

Sixteen Acres Of Land In St. Boniface Sold For \$100,000

An airplane manufacturing plant, headed as the greatest industrial advancement in years, will be established in St. Boniface, immediately. Announcement that the factory would be brought to St. Boniface was made by R. C. Mills, of Mills and Company, Winnipeg, following a special meeting of the Cathedral city council, when seven acres of land were sold for the site.

The plant, according to Mr. Mills, will be the Canadian branch of one of the largest airplane manufacturing concerns in the world, and it will be controlled entirely in Canada. The name of the parent company has not yet been divulged. The seven-acre site of the new plant, which was sold with truckage, is known as the old Pat Lauder Company's and old A. J. Lauder Ice Company's property, and is located between Tache Avenue and the Newwood Bridge.

Canada's North Is Real Beauty Land

Vivid Picture Of Charm Reported In R.C.M.P. Report

Canada's great Northland is pictured, not as a region of solitude and waste, but as a land of beauty and attractiveness, in the report of the Royal Canadian Mounted Police, tabled in the House of Commons. East of the Great Slave Lake the scenic beauty is inspiring, according to Inspector Gagnon, who describing a lengthy patrol to Port Reliance says: "The Hornby and Inconnu channels are the most beautiful routes possible in every season. There is something to captivate attention, either in the abrupt shores or cliffs, or their varied coloration, or the thousand and one islands one encounters. Both channels are lined with innumerable pleasant little harbors.

"The waters are very clear and cold, and full of delicious trout."

There's a Reason

The Egyptian government is planning a motor road over the route followed by the Israelites on their journey to the Promised Land. But nothing is said as yet about drying up the Red Sea, says the Buffalo Courier-Express.

"What is it that lives in barn, eats oats, walks on four legs, and can go as well from behind as from the front?" "It'll bite. What is it?" "A blind horse."

Powder in guns for 40 years was found in good condition by University of Nevada.

Some years ago when our neighbors to the north betrayed their inclination to challenge Canada's right to her unoccupied Arctic hinterland, with particular reference to Ellesmere Island, the advisability of taking more active steps to prevent trouble became apparent. That the government, the Royal Canadian Mounted Police, offered a ready-hand solution of the problem and shortly afterwards the business of establishing more northerly outposts was undertaken seriously. It began in 1920 with the placing of a detachment at Port Burwell, near Cape Chidley, at the northeastern tip of the continental mainland, to assist the Canadian Department of Control the inward and outward bound Hudson's Bay trade. Since then police posts have been located on the three great islands forming the western boundary of the land of water west of Greenland. That lane is controlled of Davis Strait, Foul Bay, Smith Sound, Kane Basin and Kennedy Channel, hitherto together furnishing the avenue of approach to the North Pole.

On Baffin Island, the southernmost of these boundary islands, three detachments of police are stationed at Davis Inlet, at the northern end; Pangnirtung, on Cumberland Gulf, and Lake Harbor, in the south. The detachment on central island, North Devon, is Dundas Harbor, and on Ellesmere Island, the northernmost, is a detachment at La Roche Peninsula, on the east coast, in latitude 79.01 degrees north. In addition, detachments have been sent to the three various Arctic islands. In service at its bases on Hudson Strait, where it kept ice conditions continuously under observation last winter. From these various Arctic islands, the whole northern archipelago has been and still is being controlled and monitored. The police stations have not hesitated to make very long journeys. For example, in the early part of 1927 the non-commissioned officer in charge of the detachment crossed Ellesmere Island to visit the cluster of islands to the west—Axel Heider, and others—some undiscovered territory until a quarter of a century ago. This patrol lasted fifty-four days and covered 1,200 miles.

About the same time a non-commissioned officer in charge of the Pangnirtung detachment made a patrol of about the same distance, skirting the southeastern coast of Baffin Island and returning across the almost unknown interior. A constable, finding the body of a fur trader in his cabin on Baffin Island, hauled it out on his sled for 450 miles to the detachment at Pond Inlet for an inquest and Christian burial. The officers and non-commissioned officers in charge of mounted police detachments have commissions as customs collectors, postmasters, coroners, and magistrates. Back in 1903, the detachment to be the most northerly post office in the world. The Eskimos have shown since disposition for violence than further west, but on occasion, in 1920, a white man was killed by them near Cape Crawford, the northwestern tip of Baffin Island. The non-commissioned officer in charge at Pond Inlet investigated, found the body, in his capacity as coroner held an inquest, arrested the accused, collected the witnesses and as magistrate committed the accused for trial. In 1923 a special court was sent from eastern Canada, which tried, convicted and sentenced those responsible for the homicide. There also have been cases of religious mania and homicidal insanity among these people. The relations between the police and the Eskimos are good.

When the Empress Dowager of China died, in 1908, her pearl necklace was valued at \$100,000. It contained nearly six thousand pearls and was valued at \$200,000.

"Look here, this new crown has made my shoes look like new." "Um—suppose you swallowed some?" Pages Gates, Yverdon.

CLEAN UP

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

THE DRIVE TO FINISH OLD MAN DIRT IS ON

Greatest Effort in History of Canadian Cleanliness Includes Hundreds of Communities

The greatest effort in the history of Canadian cleanliness is on. Cleanliness has a history. It's influence can be traced down the ages. Those races that were Clean were the races that were Masters.

The Athenians, with their baths and beautiful homes conquered the Persians, with their unkempt beards and dirty skins. The Romans, with their aqueducts, their barbers, their gardens beat back the barbarians with their goat skins and greasy fingers.

Louis the Fourteenth was the dirtiest monarch France ever had and one of her nightlings. Fifth kept the Panama Canal from being built years before it finally was. Disbelief doubted when the dirty and the ignorant gained control in Russia— anarchy breeds in filth and squalor.

Cleanliness has always been equal-

ent. Modern sanitation saved millions of lives in the great war.

Real people, the wise, the leaders in progress, always have fought for cleanliness. At times it has been a sporadic fight, a skirmish. A clean man was handicapped by a neighbor who let his premises run wild. But co-operation has been brought to play at last.

This year, in Canada alone, hundreds of villages, towns and cities are campaigning for cleanliness, health, and beauty. They are not doing so for a day or a week but in continuous campaign. There is a steady pressure.

Tin cans, flies, refuse, dirt, waste paper, unsightly buildings, unpainted surfaces are taboo. The drive is on. It is the painting coat, and perhaps more turpentine than usual in the second coat, but when every care is taken, paint will sometimes turn to yellow pine, where it is no fault of the painter or the paint. Liberal use of turpentine and vigorous use of the brush to work the paint into the wood are necessary to success on yellow pine.

5. **Fat Resinous Wood Not Properly Seasoned or Prepared For Painting.** This is a recent trouble due to the scarcity of well-dried lumber. The chief trouble is with oil in the painting coat, and perhaps more turpentine than usual in the second coat, but when every care is taken, paint will sometimes turn to yellow pine, where it is no fault of the painter or the paint. Liberal use of turpentine and vigorous use of the brush to work the paint into the wood are necessary to success on yellow pine.

6. **Bolled Out.** Never use boiled oil in the priming coat, even when it is genuine boiled linseed oil; its preparation gives a glossy, varnish-like surface, and the priming coat should always be flat, or the succeeding coat will not adhere to it. Bolled oil should never be used for any coat in outside painting.

Paint may fail from causes other than those named because of application on dirty or greasy surfaces; because of leaky roofs; because of the use of adulterated linseed oil and poor dryers; because the coats are too thick, or because the weather is too dry, but the majority of cases are covered by the causes specified in this article.

It is never advisable to try to paint a single roof unless it has been previously painted, because the water gets under the shingles causing them to rot and curl up. It is always well, however, to put on a new shingle roof to dry the bundles into a properly prepared shingle. This is especially true nowadays as the quality of shingles is much poorer than formerly.

It is good policy not only to prevent water from getting under the shingles, but also to forestall paint troubles. The commonest of all paint troubles is peeling, the chief cause of which is moisture, and moisture in turn is due to:

1. **Dampness in the Wood.** This means not only wood which is damp from deterioration, but also wood that is too fresh, and too green, to be painted. The commonest of all paint troubles is peeling, the chief cause of which is moisture, and moisture in turn is due to:

2. **Dampness Back of the Wood.** This is commonly due to green plaster. Too often in a hurry to complete a house the painters are put to work on the outside while the plasterers are finishing the inside. To complete the roof, about the time the paint is dry the furnace is started to dry the plaster. The moisture must find an outlet and is driven out through the paint, which is the cause of peeling.

3. **Ochre Priming Coats.** Common ochre is the cheapest pigment, and when once incorporated in the priming coat is the foundation on which the finishing coat depends, he does not have to be a paint manufacturer or dealer to appreciate how absurd is the statement so often made "Anything is good enough so long as it will hold." Cheap ochre is nothing but clay stained, which makes a slippery, brittle paint.

4. **Old Paint Loosely Attached to Wood and Not Thoroughly Cleaned Away.** If old paint is not firmly attached to the wood the contraction in the drying of the new paint will peel it off. Repeat before the old paint begins to let go. It's poor economy to delay repainting.

5. **Use of the Under Coat is Brittle.** Scrap, sand-paper, and wire-brush use all loose particles before repainting. If too far gone remove with a paint scraper. Always remember these thin coats of paint are better than two thick ones. The thick coats may

may cost more than double in the end.

5. **Fat Resinous Wood Not Properly Seasoned or Prepared For Painting.** This is a recent trouble due to the scarcity of well-dried lumber. The chief trouble is with oil in the painting coat, and perhaps more turpentine than usual in the second coat, but when every care is taken, paint will sometimes turn to yellow pine, where it is no fault of the painter or the paint. Liberal use of turpentine and vigorous use of the brush to work the paint into the wood are necessary to success on yellow pine.

6. **Bolled Out.** Never use boiled oil in the priming coat, even when it is genuine boiled linseed oil; its preparation gives a glossy, varnish-like surface, and the priming coat should always be flat, or the succeeding coat will not adhere to it. Bolled oil should never be used for any coat in outside painting.

Paint may fail from causes other than those named because of application on dirty or greasy surfaces; because of leaky roofs; because of the use of adulterated linseed oil and poor dryers; because the coats are too thick, or because the weather is too dry, but the majority of cases are covered by the causes specified in this article.

It is never advisable to try to paint a single roof unless it has been previously painted, because the water gets under the shingles causing them to rot and curl up. It is always well, however, to put on a new shingle roof to dry the bundles into a properly prepared shingle. This is especially true nowadays as the quality of shingles is much poorer than formerly.

It is good policy not only to prevent water from getting under the shingles, but also to forestall paint troubles. The commonest of all paint troubles is peeling, the chief cause of which is moisture, and moisture in turn is due to:

1. **Dampness in the Wood.** This means not only wood which is damp from deterioration, but also wood that is too fresh, and too green, to be painted. The commonest of all paint troubles is peeling, the chief cause of which is moisture, and moisture in turn is due to:

2. **Dampness Back of the Wood.** This is commonly due to green plaster. Too often in a hurry to complete a house the painters are put to work on the outside while the plasterers are finishing the inside. To complete the roof, about the time the paint is dry the furnace is started to dry the plaster. The moisture must find an outlet and is driven out through the paint, which is the cause of peeling.

3. **Ochre Priming Coats.** Common ochre is the cheapest pigment, and when once incorporated in the priming coat is the foundation on which the finishing coat depends, he does not have to be a paint manufacturer or dealer to appreciate how absurd is the statement so often made "Anything is good enough so long as it will hold." Cheap ochre is nothing but clay stained, which makes a slippery, brittle paint.

4. **Old Paint Loosely Attached to Wood and Not Thoroughly Cleaned Away.** If old paint is not firmly attached to the wood the contraction in the drying of the new paint will peel it off. Repeat before the old paint begins to let go. It's poor economy to delay repainting.

5. **Use of the Under Coat is Brittle.** Scrap, sand-paper, and wire-brush use all loose particles before repainting. If too far gone remove with a paint scraper. Always remember these thin coats of paint are better than two thick ones. The thick coats may

may cost more than double in the end.

5. **Fat Resinous Wood Not Properly Seasoned or Prepared For Painting.** This is a recent trouble due to the scarcity of well-dried lumber. The chief trouble is with oil in the painting coat, and perhaps more turpentine than usual in the second coat, but when every care is taken, paint will sometimes turn to yellow pine, where it is no fault of the painter or the paint. Liberal use of turpentine and vigorous use of the brush to work the paint into the wood are necessary to success on yellow pine.

6. **Bolled Out.** Never use boiled oil in the priming coat, even when it is genuine boiled linseed oil; its preparation gives a glossy, varnish-like surface, and the priming coat should always be flat, or the succeeding coat will not adhere to it. Bolled oil should never be used for any coat in outside painting.

Paint may fail from causes other than those named because of application on dirty or greasy surfaces; because of leaky roofs; because of the use of adulterated linseed oil and poor dryers; because the coats are too thick, or because the weather is too dry, but the majority of cases are covered by the causes specified in this article.

4. **Old Paint Loosely Attached to Wood and Not Thoroughly Cleaned Away.** If old paint is not firmly attached to the wood the contraction in the drying of the new paint will peel it off. Repeat before the old paint begins to let go. It's poor economy to delay repainting.

Rules for Fire Prevention

Do not permit rubbish, greasy paper, and useless waste to accumulate in or around buildings.

Do not allow matches kept in your rooms, offices and stores in other than metal boxes. Use safety matches.

Do not allow children under ten years of age to use matches.

Do not use lamps and lamp burners that are not clean.

Do not tamper with or extend electric wire, employ an electrician.

Do not keep gasoline in other than air-tight cans painted red.

Do not fill tank of gas stove when lighted and, by daylight only.

Do not permit a rubber tube connection to a gas stove.

Do not carelessly throw cigar and cigarette stumps where they could cause a fire.

Do not fail to warn your children of the dangerous bonfire. Loss through preventable fires in the United States is \$250,000,000, which, however, is exceeded by the annual loss through the lack of painting—according to Prof. H. H. King, who has conducted paint tests for several years for the people of Kansas, at the Kansas Agricultural College.

Clean-Up and Paint-Up campaigns reduce fire losses and insurance rates; increases property values; remove unsafe buildings; save the life; clean up the city; make the city more attractive and safer homes and places of business, and develops a community spirit that permanently improves a cleaner, safer, healthier and more beautiful town.

Don't Neglect Painting Up

Make the Paint Brush the Partner Of the Scrub Brush In Your Campaign Against Dirt

Paint-Up goes hand in hand with Clean-Up. When you have dusted and swept and mopped the corners and the open spaces, put the paint brush to work. It will be easy to keep things clean then. A painted surface does not accumulate dirt like an unpainted one. Besides, dirt is more obvious on a painted surface, and less apt to be ignored. Paintfulness is the best incentive to cleanliness, which you know is next to godliness.

Make the paint brush the partner of the scrubbing brush. They make a whole team. Enlist both of them for Clean-Up and Paint-Up.

It doesn't need much argument to convince a man that his house and his barn and his whole farm will be worth more money if the buildings are kept in the best order.

Don't Forget the Garden

You Can Make Enough Out Of the Back Yard To Paint Your House

Don't forget that garden this year. Gardens save thousands of dollars for householders, they conserve and add to the food supply and give many persons a healthy and inexpensive form of outdoor exercise.

Cultivating the back yard regularly will save enough money to save the house for years, by painting regularly. The work is congenial and creates contentment and "garden satisfaction."

Clean-Up and Paint-Up On the Farm

The man who owns a farm or lives on one should be just as much interested in Clean-Up and Paint-Up as the city householder. And the incentive to start such campaigns has been just as marked in the rural districts as in the more thickly populated ones.

Farmers everywhere are being urged to remove ramshackle buildings, repair and paint those that remain, trim hedges and trees, and clean and paint tools and machinery.

Holding of the Nationalist flag in Manchuria on December 31, placed the greater part of China under the Nationalist government.

Toothbrushes and handkerchiefs have figured among the tokens of approval presented by Chinese generals to the troops under their command.

These All Count

Here are some pointers for citizens who want to regenerate their community with a real Clean Up and Paint Up campaign:

1. Take away all the ashes and trash from your back yard immediately. Send your rubbish to the dumping ground.

2. Suggest to several men with teams, that they drive through the alleys with a sign, "Clean-Up Walk" on their wagons; also a bell calling attention. People are only glad to pay such a man for hauling their trash away.

3. Burn all rubbish that will burn. Clean your vacant lots and alley ways.

4. Make your street and parking lots as trim and well kept as possible.

5. Refrain from throwing old paper, banana and orange skins into the streets.

6. Plant some grass and flower seeds to make your home beautiful.

7. If your street front is dingy, paint it. Nothing will do more to improve the appearance of a town than the liberal use of paint.

8. If there are any unnecessary, unsightly sheds in your back yard, tear them down. They detract from the beauty of your home and the town. Use open spaces and fresh air better.

9. If your walk is an eyesore to those travelling over it, repair it or build a new one.

10. Trim hedges and trees and spray trees.

11. Paint and whitewash barns, poultry houses, outbuildings, etc.

12. Paint localities and machinery.

The local "Clean Up and Paint Up" campaign offers the most direct and practical and permanent avenue through which women, organized or unorganized, can work for homes and home towns beautiful and sanitary.

Keeps Floors Beautiful

Beautiful floors are largely a matter of prevention—the great secret is to put them in perfect condition—and then keep them that way. Doorways, passages and tracks become worn and unsightly first. You can keep these spots looking well by waxing them frequently. This requires but little time and effort if a good prepared wax and floor polishing brush are used.

The Clean Town Is the Healthy Town

Germes Lurk in Filth and Clean-Up and Paint-Up Will Chase Them

It long has been a well known fact that dirt and disease walked hand in hand. Influenza, typhoid, pneumonia, tuberculosis, and other germ diseases exist because dirt exists. Get rid of dirt, and many diseases will be wiped out.

Cleanliness and the liberal use of the paint brush and mop and broom will make it hard for dirt to exist. If your town is spotted it will be a healthy town. And there is no better advertisement for a community than a clean death rate.

Make your community clean and healthy. Wide-awake Canadian towns are conducting Clean-Up and Paint-Up campaigns, and Home and Community Beautification campaigns as much for the sake of health as for the sake of beauty.

In Alameda, Cal., campaign workers went to the length of placarding houses with the inscriptions, "Clean," "Dirty," or "Filthy," as the case might be. It was heroic treatment but it proved effective.

Make your town a clean town and you will also make it a healthy one.

For Health's Sake

Clean - Up and Paint-Up—Guard Against Epidemics and Remove Their Cause

Tuberculosis and other germ diseases are generally brought about by dirt and filth. The germs of tuberculosis cannot live where there is sunlight, cleanliness, and fresh air. The scrubbing brush, soap and water, paint and whitewash are deadly enemies of tuberculosis. The easiest way to get rid of the germs that have nested in your house and around your premises is: Clean-Up and Paint-Up.

The cleaning out of filth will keep down influenza, infantile paralysis, typhoid, and diphtheria, as well as tuberculosis. And the painting brush should follow the scrubbing brush so that the places cleaned may be kept clean.

Do you want a clean town? Then do your part. Go through your house from cellar to roof and gather up all the old, useless, worn-out things stored away and get rid of them now. Clean out all rubbish, ashes, etc., in the cellars, yards, alleys, and alleyways.

Screen your homes thoroughly. Remove any animal or vegetable matter. Manure breeds flies, which carry disease to human beings, especially the babies. Clean out and fix up the manure bins. Repair your yard fences, poultry houses, out-houses, etc. Then paint or whitewash them. Don't spare the paint.

NICE WORDS WON'T DYE a dress or coat...

Neither pretty pictures nor colorful adjectives will dye a dress or coat. It takes real dyes to do the work; dyes made from pure anilines.

Next time you have dyeing to do, try Diamond Dyes. See how easy it is to use them. They compare the results. Your dealer will refund your money if you don't agree they are the best.

You get more of the dye-stuff from Diamond Dyes; no streaking or spotting. Just fresh, crisp, bright new color. And watch the way they retain their brilliance through wear and washing. They are better dyes because they contain glass. They will retain their color three to five times more than other dyes. But you pay no more for them than for ordinary dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or rest silk, wool, cotton, linen, rayon or mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

CHAPTER XVII.—Continued

Connie made no attempt to check her cayuse's onward flight. She was in no mood to listen to the kudos of the admiring crowd; she wanted only to get away from the scene as quickly as possible. The movement toward the centre gave her the opportunity she desired, and she urged the weary cayuse through an opening on her left. Many hands were reached up to congratulate her, but she pushed her way through to the trail.

At the sound of hoof-beats behind her she turned to see Lafontaine urging his tired mount toward the Pemberton trail and looking back apprehensively over his shoulder.

Several men were running after him, shaking their fists and uttering loud imprecations. A man leaped from behind a jack-pine to land in the path of the half-breed, lunged for the reins, missed, then caught the stirrup. Lafontaine struck the man a blow with his heavy whip that loosened his hold and felled him to the ground. Connie saw Gillis break from the crowd, jump to the saddle of a cayuse and start after the fleeing man just as the latter disappeared in the

woods. Gillis waved his hand to her and vanished in pursuit. She urged Pegasus to the shelter of the timber as she saw her father and Donald running toward her.

The strenuous race and the spectacular fight had left both horse and rider in a badly shaken condition. Connie's body was bruised and sore, and her head ached horribly. The cayuse's strained muscles were stiffening, he was limping badly, and his head drooped wearily as he dragged his tired limbs up the steep trail.

At the barn door Connie dismounted stiffly, removed the horse's bridle, then threw her arms passionately around his neck and stroked his symmetrical head with soft caresses. "I'm so sorry, Peggy darling," she said in a choking voice.

The horse reared her shoulder in a weak attempt at playfulness, as if to signify that he quite understood.

Connie's eyes brightened at a sudden thought. "Peggy, dear," she whispered softly as she nestled her cheek against his soft nose "do you know that I can have some nice clothes now? Let's and let's of nice things. I am going to buy you a blanket—a nice thick one for winter—and some ribbons for your mane. And you, Peggy"—with a flood of tenderness in her voice—"you won't let this for me."

She was crouching over nothing in his ear that Louise had understood when her father appeared, breathless from running, his face gray and anxious.

"Are you all right, Constance darling?"

Connie stepped forward. She was pale and weak, but her colorless lips tried to form a smile. "Yes, Daddy dear—I'm all right—"

Her voice trailed to a whisper and the blue eyes closed as darkness fell upon her like a cloud. Swaying uncertainly for an instant, she fell like a broken flower into her father's outstretched arms. For the first time in her life Connie had fainted. She lay like a child in his trembling arms, her upturned face wearing the pallor of death.

With a prayer on his lips and an agony of fear in his heart, her father carried her to the cabin and tenderly stretched the bruised little body on the coarse blankets of her bunk.

CHAPTER XVIII.

At the race-course the crowd added excitedly about the judges' stand, or stood in groups talking of the wonderful performance of the spotted cayuse that had made the erstwhile champion appear a mere tyro.

Gillis came riding slowly from the woods and was hailed by questioning shouts from a score of throats.

"Did you get him?"

A bloody handkerchief was wrapped around the big man's head, and a livid welt showed on his forehead. He smiled grimly as he dismounted, "I got a skunk," he answered vaguely.

"Just a minute, Dad," she cried as she heard them approaching.

Fervently she rushed to the small mirror to glance at her reflection. With nervous hands she smoothed her hair and smoothed imaginary wrinkles from the collar of her dress. Then she sat down gravely and arranged her skirts about her.

"I've brought your big trunk with the 'bulky top,' Miss Wainwright," he called.

Connie sat up in her bunk, so quickly that her head bumped the boards above. "Miss Wainwright," he called her! Her eyes glowed in the dusky half-light. "Thank you so much," she replied.

The next day Wainwright informed Donald that Connie was up and would see him.

"Just a minute, Dad," she cried as she heard them approaching.

Fervently she rushed to the small mirror to glance at her reflection. With nervous hands she smoothed her hair and smoothed imaginary wrinkles from the collar of her dress. Then she sat down gravely and arranged her skirts about her.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death, may result from putting corns with an infected razor. Quick relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, use PUTNAM'S CORN EXTRACTOR. It is reliable, safe, and sure to remove the corns so they drop right off. No pain, no sores, but quick relief from more corns than to all who use PUTNAM'S CORN EXTRACTOR. 25c. at all dealers.

Australian Wire Firm
An established wire firm of Australia has incorporated under the British Columbia provincial statutes and proposes importing Australian wires in large quantities.

KEEP YOUR BABY HAPPY AND WELL

Every mother wishes her child or children to be well and happy; to be bright-eyed, to be cheerful and girls. No mother, though, can expect her children to escape all the ills of babyhood and childhood, but she can do much to help them fight the battle for health.

All prudent mothers constantly keep at hand the means of aiding their little ones when sickness comes suddenly—as it generally does in the case of children. In every home where there are infants and young children, Baby's Own Tablets should be found. Read what Mrs. Mary Hill, Centre Dunsmuir, Ont., says concerning these "Tablets": "I am the mother of six children and would not be without Baby's Own Tablets. They are a wonderful medicine for little ones."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus break up colds and simple fever, banish constipation and indigestion and allay the irritation accompanying the cutting of teeth. They are absolutely safe and are pleasant to take. The Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Scotch mother complains that her daughters "dance away from her." Having their Highland fling probably.

Every evening Donald called at the Wainwright home, bringing little delicacies carefully prepared by Andy. Once he spoke to Connie outside the door, and her merriment voice gave him an odd thrill. He pondered over this as he made his way down the hill. He was struck by a sudden thought. His face broke into a smile and he shrugged his shoulders.

"Nonsense," he said aloud. Janet remained several days after her friends had returned to the city. She tried in vain to restore the familiar relationship which formerly existed between herself and Donald. His evening visits to the cabin on the mountain deprived her of his company, and she, half-jestingly, reproached him for his inattention to her. With spirits depressed and a despondent look in her dark eyes, Janet returned to Vancouver.

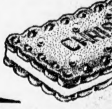

One evening Wainwright gave Donald a letter to post, addressed to a big department store in Vancouver. A few days later there arrived numerous bundles and boxes, including a big trunk. Donald with the assistance of Gillis's crew carried them up the hill.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is all, effective, yet harmless. It has been the standard antidote for 20 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet. The pain de-

parts. You are happy again in five minutes. Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Little Helps For This Week

"Which hope we have as an offering of the soul, both sure and steadfast."—Hervieux, vi. 19.

God hath ever! Wherefore, soul, despair thou never! What though thou treadst with bleeding feet A thorny path of grief and gloom, Thy God will choose the way most meet.

To lead thee heavenwards, lead these home. For this life's long night of nadir He will give thee peace and gladness! Remember in thy pains, God, O'er all for ever reigns.

Who can really think and not think hopefully? You were in my mind last night, and you brought a little host to sail me past dependency of life and fear of extinction. When we despair and despair things, it is our senses in revolt, and they have made the sovereign brain their drudge. I heard you whisper, "There is nothing the body suffers that the soul may not profit by." With that I fall into the dark; it is my promise of the immortal—teaches me to see immortality for us.

—George Meredith.

Commissioner For Panama
A Canadian trade commissioner's office has been opened in Panama, and a trade commissioner will shortly be appointed it is officially announced. At present most of the Central American Republics come under the commissioner's office in Mexico, while Venezuela and Colombia come under Cuba.

Minard's Liniment for the Grippe and Flu.

The Government of Alberta will spend \$150,000 on improving and constructing roads in the province this year.

You can toll a civilized country. It's the where people kill the birds and then spend millions to fight insects.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Magistrate: Are you sure you understand the nature of an oath? Youth (sighed stiffly): Sure. Ain't I your caddy days at the links.

Minard's Liniment for Coughs and Colds.

He (earnestly)—"I mean to kiss you, I mean to kiss you, I mean to kiss you." She—"That would be only three times."

Minard's Liniment prevents Flu.

Long Air Trip Planned
One of the longest air lines in the world is being contemplated between London and Cape Town. The route, more than 8,000 miles long, will branch off at Cairo, crossing over into India.

Vinegar used in place of water when mixing plaster of paris will keep the plaster softer for a longer time than water.

**CONSTIPATION
RELIEVED
QUICKLY**
This Powerful Vegetable Pill will move the bowels without any pain and without depressing after-effects. Sick Headache, Indigestion, Bilelessness, Bad Complexion quickly vanish. Children and Adults can easily swallow Dr. Carter's, sugar coated pills. They are free from calomel and poisonous drugs. All Druggists 25c and 75c per box.

CARTER'S PINK PILLS
DO YOU
like to paint? You have greening cards and small pictures ready to be sold. This work is intensely interesting and profitable. Send for the list of selection of cards, catalogues of designs and literature.

"FEEL WELL AND STRONG"

MRS. J. MALIN
R.R. No. 1, Burton St., Hamilton, Ont.
"I have a toothache in the store and do my own housework. I had a very bad toothache and I got nervous and run down and was in bed nearly all summer. The latest noise would make me nervous. I was told to take Lydia E. Pinkham's Vegetable Compound and I have taken seven bottles. It has made me stronger and put more color into my face. I get along nicely now with my work and with my four children. I would like to answer letters."—Mrs. J. Malin.

MRS. FRANK LUTHE
R. No. 1, Box 28, Larkins, N. Dakota
"I had two babies which I lost at seven months. Before my third baby was born my husband advised me to take your medicine and he bought me three bottles of it. When I had taken the first one I began to feel better so I kept on taking it. The whole family was healthy baby boy and we are so proud of him and praise Lydia E. Pinkham's Vegetable Compound for the help it gave me. I feel well and strong."—Mrs. Frank Luthe.

Lydia E. Pinkham's Vegetable Compound

Thursday, May 16 1929

Empress Sports Day, May 29.

A. McElroy, was enter-
taining his sister from Wim-
pieg over the week end.

Plans and estimated bills of
material for the new hospital
are now being prepared, and
it is expected that commence-
ment of the new structure will
be started almost immediately.

"The Black Pirate" is an ac-
tural film in that it is made ex-
actly in natural colorings
suiting to the eye. The ac-
tural film is a sequence of ex-
quisite lovely pictures. You
should see this beautiful pic-
ture.

C. M. C. C. C. arrived in
town this week and has joined
the staff of the Empress Lamb-
er Yards.

It is said that the White
Foot has captured the Lake
of the Woods elevators at Em-
press and Storow.

A bee was recently held by
the friends and neighbors of
Mr. G. T. T. at his farm,
and 175 bees of what was
seeded by them in a single day.
Mr. T. has been ill with
pneumonia. This practical ex-
pression of sympathy is surely
worthy of big results and we
hope that those efforts meet
with bumper returns.

The Social C. G. T. will hold
a novelty Tea and Boxer at
the White Lunch on Satur-
day, May 25th, from 3 until
6 p.m.

NOTICE OF POLL

PUBLIC NOTICE is hereby given that
a poll of the electors of the Rural Mun-
icipality of Mantario No. 262, for and
against Bylaw No. 262 of the said Mun-
icipality, to authorize an expenditure of
the sum of \$4000 in the year 1929 for
the purpose of purchasing a site at Eyre
and erecting thereon a building for a
Municipal Office and Council Chamber,
will be held on Monday the 27th day of
May, 1929, from Nine o'clock in the fore-
noon to Five o'clock in the afternoon
(Mountain Standard Time) at—
Div. II, A. John Chapman's, N.W. 31-24-28, w. 3.
B. Gavin Hamilton's, N.W. 31-25-28, w. 3.
Div. III, A. Wesley Rivers', N.W. 31-24-29, w. 3.
B. Mayfield Community Hall.
Div. IV, The Pool Hall, Mantario.
Div. V, Eyre Departmental Store.
Div. VI, A. Orange Hall.
B. Wm. Hishop's, Ely 34-27-29, w. 3.

And that I will be at Eyre, at the
Municipal Office, N.E. 34-27-27, w. 3 on
May, the 31st day of May, 1929, at
noon, to hear the vote and declare the
result of the election.

GIVEN UNDER MY HAND AT
EYRE, THIS 14th DAY OF MAY,
1929.

C. EVANS SARGENT,
Returning Officer.

BY-LAW No. 52

A BY-LAW OF THE RURAL MUNI-
CIPALITY OF MANTARIO No. 262,
to authorize an expenditure of \$4000
for purpose of erecting Municipal
buildings.

The Council of the Rural Municipality
of Mantario No. 262 enacted as follows:
1. That it shall be lawful for the
Council of the Rural Municipality of
Mantario No. 262 and it is hereby au-
thorized to make an expenditure of
\$4000 in the year 1929 for the purpose of purchasing
a site and erecting a Municipal Office
and Council Chamber at EYRE,
Saskatchewan.

Done and passed in Council assembled
and read three times by the unanimous
consent of the Council of the Rural
Municipality of Mantario No. 262 in
the Province of Saskatchewan, this 4th
day of May, 1929, A.D.
